

BELGRADE WOMEN'S CYBER FORUM 2019: LAUNCHING CAREERS IN CYBER SPACE

September 19, Belgrade City Hall

Initiated by the [Energypact Foundation \(www.energypact.org\)](http://www.energypact.org) in the context of its flagship event, the [Vienna Cyber Security Week \(viennacybersecurityweek.org\)](http://viennacybersecurityweek.org), the Women's Cyber Forum has the mission to build awareness and promote cyber security, by conducting a series of one day seminars focused on information sharing, networking and mentoring for women professionals seeking opportunities in cyber security.

The goal of these seminars is to create a platform for information sharing, networking and mentoring and to raise awareness about the importance of cyber security as a career choice for young women in particular.

These seminars are designed for young professional women and men with an interest in cyber security issues. Desired attendees include women and male allies already engaged or considering careers in cyber security, including university students and faculty, industry professionals, members of the government, and professional organizations.

The rapid expansion of the cyber security sector offers one of the fastest growing areas of opportunity for professionals seeking to enhance or diversify their career. A 2018 the Forbes magazine reported that there will be up to 3.5 million job openings by 2021. Meanwhile, women make up only 20% of the cybersecurity workforce. While that's up from a mere 11% in 2013, there's still a lot of opportunity to be seized in cybersecurity careers.

This is an unsatisfactory and unsustainable model. Cyber security is not merely a technical, but a societal and business challenge that requires a diverse set of disciplines and skillsets that includes traditional areas such as computer science, but also increasingly requires strong competences in criminology, psychology, business, law, and political science.

Together with its national and international and governmental and non-governmental partners, The Vienna based Women's Cyber Forum is initiating the Western Balkans Women's Cyber Forum Project, a series of conferences and seminars to be organized in the coming period.

The inaugural conference – pilot project will be held on September 19, 2019 in Belgrade, Serbia, considering particularly the challenging projects of the Digital Serbia Initiative, the recent Serbian Initiative of Dual Education and the Digital Agenda for the Western Balkans launched by the European Commission.
